## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5-7, 9, 11-13, and 15-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Masaki et al. (7,173,666).

Regarding claim 1, Masaki discloses a display having a first aspect ratio (500), a source of video having a second aspect ratio (100), and a means for using motion vectors in the video to establish what portion of a video frame to present (200, 300, 400).

Regarding claims 2 and 3, the means (200, 300, and 400) are intended to be at the source or the display.

Regarding claim 5, see col. 22, lines 32-50.

Regarding claim 6, see col. 14, lines 26-32.

Regarding claim 7, see col. 14, lines 33-40.

Regarding claim 9, 11, 12, 13, 15, 17, 18, and 19, see the similar rejections as set forth above.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 8, 10, 14, 16, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Masaki et al. (7,173,666).

Regarding claim 4, Masaki does not specify that the video is an MPEG-encoded video stream as claimed. In any event, using MPEG to compress video signals is well known in the art because it effectively reduces the bandwidth required to transmit the video signals. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include a MPEG encoder into Masaki so that the video signals could be transmitted from the source to the display end with a minimal bandwidth. Masaki also teaches that the aspect ratio of the source can be in any ratio (col. 11, lines 7-14). Hence, the claimed 16:9 would have been one of them.

Regarding claim 8, Masaki does not specify that the logic pans the video at least in part based on a type of program embodied by the video. In any event, Masaki teaches that concepts of the present invention are readily applicable to any non-standard aspect ratio imager, scene, or image. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to modify Masaki to pan the image based on a sport scene so that the action of the sport could be tracked constantly.

Regarding claims 10 and 16, see rejection to claim 4.

Regarding claims 14 and 20, see rejection to claim 8.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Manning (7,184,093) shows a panning based on motion.
